Perkins Road Extreme Park Baton Rouge, LA

The ground has broken on an 35,000 square foot skate park in Baton Rouge, LA and California Skateparks is busy building the Beginner Area and the bowls in the Intermediate/Advanced section. SITE skate park designer Kanten-Russell just returned from Baton Rouge after conducting a construction observation visit and met with the City and California Skateparks to help troubleshoot all construction questions related to the design.

SITE Design Group, Inc. was hired to re-work a Master Plan, create construction documents and perform construction observation for an extreme sports park located in Baton Rouge, LA. The plan called for a centralized X-treme sports center building and plaza that functions as the center of the extreme sports programming. Here the community playground, rock climbing, concessions, rest rooms and offices will be located. Also included is a proposed coffee shop or internet cafe'. Adjacent to the X-treme sports center building will be the skate park and BMX area with two dirt tracks that will be sanctioned by the ABA (American Bicycle Association).
